ACKNOWLEDGEMENT OF COUNTRY

The Salvation Army Australia acknowledges the Traditional Owners of the lands and waters throughout Australia.

We pay our respect to Elders and acknowledge their continuing relationship to this land and the ongoing living cultures of Aboriginal and Torres Strait Islander peoples across Australia. We also acknowledge future aspirations of all First Nations peoples.

Through respectful relationships we will work for the mutual flourishing of Aboriginal and Torres Strait Islander Australians and non-Indigenous Australians.

We commit ourselves in prayer and practice to this land of Australia and its people, seeking reconciliation, unity and equity.

TRADITIONAL OWNERS

Bidgeegal, Dharug/Darug, Dharawal, Eora, Gweagal, Toogagal, Weymaly

INCLUSION STATEMENT

We value and include people of all cultures, languages, abilities, sexual orientations, gender identities, gender expressions and intersex status. We are committed to providing programs that are fully inclusive. We are committed to the safety and wellbeing of people of all ages, particularly children.

OUR VALUES ARE:

Integrity
Compassion
Respect
Diversity
Collaboration

The Salvation Army is a worldwide movement known for its acceptance and unconditional love for all people. We love unconditionally, because God first loved us.

The Bible says, “God so loves the world” (John 3:16, RGT). As both a church and charity, we believe all people are loved by God and are worthy of having their needs met. Everyone is welcome to find love, hope and acceptance at The Salvation Army.

The Salvation Army Australia Territory wishes to acknowledge that members of the LGBTIQA+ community have experienced hurt and exclusion because of mixed comments and responses made in the past.

The Salvation Army is committed to inclusive practice that recognises and values diversity. We are ensuring our services affirm the right to equality, fairness, and decency for all LGBTIQA+ people, rectifying all

forms of discriminatory practice throughout the organisation.

We seek to partner with LGBTIQA+ people and allies to work with us to build an inclusive, accessible and culturally safe environment in every aspect of Salvation Army organisation and services. Everyone has a right to feel safe and respected.

The hand-heart-shield motif speaks of the need to raise our hands and be counted, and that we need to do so with love and hope.

ABOUT THE SOCIAL JUSTICE STOCKTAKE	24
ABOUT THE SALVATION ARMY	25

THE SOCIAL JUSTICE STOCKTAKE

Working for justice is at the heart of what The Salvation Army does in Australia. It is integral to our ethos, our mission and our vision.

In our inaugural Stocktake, The Salvation Army wanted to get to the heart of what people were seeing in their local communities, and from there build a map of social justice priorities across Australia. We found surprising agreement about the issues affecting communities right across Australia, regardless of where they are and how they vote. We heard that many people feel overwhelmed, even hopeless, when asked how Australia can address the issues they see in their local communities.

In 2024 we again checked in across the nation — with almost 16,000 Australians across every state and territory and in every electorate. This time there was even more consensus about the top issues affecting individuals and communities. An extraordinary 71 per cent of survey respondents reported that housing affordability and homelessness was a key issue in their community. The majority of respondents also agreed that mental health, financial hardship, and access to health care were in the top five issues facing their communities.

The sentiment of respondents was different this time. In 2021 we heard a sense of helplessness about addressing social injustice. This year there was also an overwhelming sense of urgency in response to perceived governmental inaction — many respondents left messages calling on decision-makers to put politics aside and prioritise action.

So instead of just providing our findings, we've tried to arm readers with practical solutions and pathways towards the changes they want to see in their communities. We firmly believe that every social justice issue can be addressed. Every person can make a difference. Together, we can make an even greater difference. Our hope is that the following report will show how.

In order to reflect respondents' views accurately, quotes have not been edited for spelling or punctuation; only shortened or explicit language removed.

The Salvation Army Australia is a Christian movement dedicated to sharing the love of Jesus.

We do this by:

- Caring for people
- Creating faith pathways
- Building healthy communities
- Working for justice

Every person can make a difference. Together, we can make an even greater difference. Our hope is that the following report will show how.

RESULTS AT A GLANCE

ISSUES FOR COMMUNITY

TOTAL

Mental health	40.5%
Housing affordability and homelessness	39.6%
Financial hardship and inclusion	29.7%
Climate change	28.8%
Access to health care	19.8%

SOCIAL JUSTICE IN BANKS

The most striking result from the Stocktake is the extraordinary consensus across Australia about what issues we are seeing.

73.0%
IDENTIFIED HOUSING AFFORDABILITY AND HOMELESSNESS AS AN ISSUE IN THEIR COMMUNITY

Banks, like the rest of Australia, is experiencing a housing crisis. In Banks, 73.0 per cent of people identified housing affordability and homelessness as an issue in the community and 39.6 per cent identified it as an issue for themselves. This is even higher than the result recorded in the 2022 Social Justice Stocktake of 56.2 per cent for housing affordability and 21.0 per cent for homelessness. The best estimates available suggest there are around 465 people experiencing homelessness in Banks alone¹ and there is an unmet housing need of 4200 dwellings². Not having a safe and secure home makes every part of life more difficult. Addressing issues in the housing system (and ending homelessness) is foundational to

addressing the other social justice issues identified in this report.

Mental health was the second issue identified by people in Banks in terms of the community and the top issue for themselves. At the last Stocktake, mental health was identified by around 56.2 per cent of people in Banks. At the last Census, in Banks, 5.7 per cent of people reported being diagnosed with a long-term mental health condition, including depression or anxiety.³ Mental health is connected to every other social justice concern raised in this report and particularly linked with housing stress and homelessness.⁴ The Salvation Army's own experience has shown that mental ill health can drive and result from other

forms of disadvantage as well as exacerbate and be exacerbated by other experiences of hardship. When we consider mental health, we need to consider that a purely medical response must be complemented by actions that address underlying disadvantage. The best possible clinical care will be less effective if a person is living in their car or unsafe in their home.

The rising cost of living has impacted everyone in Australia in some way and Banks is no exception. 53.2 per cent of respondents in Banks reported that financial hardship and inclusion was an issue in their community and 29.7 per cent identified it when thinking about themselves. This compares with 23.8 per cent who identified the same issue for the community in the 2022 Stocktake. Though the overall child poverty rate in NSW is 15.1 per cent, it is much higher in some areas, for example the area of Punchbowl in Banks, where the child poverty rate is 34.9 per cent.⁵ Roughly 5215 people living in Banks are reliant on JobSeeker or Youth Allowance.⁶ The rates of both these payments are demonstrably too low and have the unintended consequence of trapping people in poverty.

In 2022, just over 1 in 6 (16 per cent) Australians were experiencing loneliness and 1 in 7 (15 per cent) were experiencing social isolation.⁷ In Banks, 36.9 per cent of respondents identified that social isolation and loneliness was an issue in the community. Certain cohorts experience loneliness at higher rates. People with disability report higher emotional loneliness (33.1 per cent) as do people who are unemployed (28.5 per cent) compared to the population level of 19.8 per cent.⁸ At the 2021 Census, there were 9608 people estimated to be living with disability in Banks⁹ and 3816 people recorded as unemployed.¹⁰ Australians who feel lonely are twice as likely to have chronic disease and 4.6 times more likely to have depression.¹¹ This is one of the many reasons why addressing loneliness needs to be a top priority in Banks.

SOCIAL JUSTICE IN BANKS CONT.

In Banks, 33.3 per cent of people identified climate change as an issue in the community and 28.8 per cent identified it as an issue for themselves. This is in line with the national result of 30.1 per cent and 30.3 per cent respectively. In the 2022 Social Justice Stocktake we only recorded the issues people identified in their community and 30.5 per cent identified climate change in Banks. The Climate Risk Map predicts that by 2050 with a 'medium' emission scenario, 7.2 per cent of properties in Banks will be at risk.¹² An extraordinary 84 per cent of people in Australia have identified that they personally

have been affected by a climate event or extreme weather¹³ so it is an indication of how serious the other social justice issues are that climate change, while ranking highly, does not rank higher.

Banks echoed the general sentiment of Australia when asked what could be done about these issues and what decision-makers needed to know. We heard from respondents in Banks a strong sense of urgency as well as reflection on the need for politics to be put to the side and immediate action taken.

“

[I would like the decision makers to know] “that [these issues] actually exist out there. That they get out of their offices and onto the streets to see what’s actually happening so they can get ideas on how to go about fixing them.”

“People are really struggling, I’m someone that earns good money and I’m struggling, can’t imagine someone on a lower income or unemployed.”

”

HOUSING AFFORDABILITY AND HOMELESSNESS

Homelessness is a widespread and serious issue in Australia — on any given night, 122,494 people in Australia are homeless;¹⁴ however the number is likely much higher given the numbers of people not recorded as “no fixed address” and the increasing impact of a tight rental market.

Homelessness is when a person does not have suitable accommodation — that might mean that a person’s dwelling is inadequate, they do not have any security that they can stay where they are or they do not have control over their space.¹⁵ Homelessness is a result of

systemic and structural issues such as poverty, low income, and a lack of safe, affordable housing. The cost of homelessness to individuals, our community and economy is enormous, and increases the longer the individual remains homeless.

People who have experienced family and domestic violence, young people, children on care and protection orders, Indigenous Australians, people leaving health or social care arrangements, and Australians aged 45 or older are among some of the people most likely to experience homelessness.¹⁶

Housing affordability relates to the relationship between expenditure on housing (prices, mortgage payments or rents) and household incomes. Any type of housing (including rental housing or home ownership, permanent or temporary, for-profit, or not-for-profit) is considered affordable if it costs less than 30 per cent of household income.

Access to appropriate, affordable, and secure housing is the basis of any individual and family’s engagement in work, education and social participation. In real terms, having a safe and secure home means having the breathing space to focus on thriving.

23%
EXPERIENCING HOMELESSNESS
12-24 YRS OLD

In 2021, 23 per cent of all people experiencing homelessness were aged between 12 and 24.¹⁷

640K
HOUSEHOLDS

Around 640,000 households in Australia are not having their housing needs met.¹⁸

174.6K
WAITING

As at June 2022, there were 174,600 households waiting to be allocated public housing, with 68,000 of these households being considered of “greatest need”.¹⁹

In a 2024 snapshot, it was found that only three rentals across the entire country were affordable for a single person receiving the JobSeeker Payment and there were no affordable rentals for someone receiving Youth Allowance.²⁰

1M
LOW-INCOME HOUSEHOLDS

In 2019-20, approximately one million low-income households were in financial housing stress, meaning they were spending more than 30 per cent of their income on housing.²¹

WE HAVE THE POWER TO MAKE A DIFFERENCE

WE CAN URGE ACTION FROM OUR GOVERNMENTS

All governments can commit to ending homelessness. This will involve all governments working together to address the structural drivers of homelessness such as poverty, low income, and the lack of social and affordable housing. Critically, while the Housing Australia Future Fund is a start, it is critical that funding for affordable housing is not at the expense of social housing — both need to be fully funded.

Governments need to work together to rapidly increase access to social housing, committing to building up social housing stock to be at least 10 per cent of total housing stock. This will relieve pressure across the entire housing continuum.

WE CAN IMPLEMENT CHANGE IN OUR COMMUNITY AND OUR WORKPLACES

Homelessness is extremely isolating and there are many places in our community where people experiencing homelessness do not feel welcome. Our community groups can ensure they remain open to people who are homeless by keeping the cost of activities and membership as low as possible or considering arrangements for lower fees for people experiencing financial hardship.

Places of business can also make sure that people experiencing homelessness are welcome and do not experience stigma or discrimination when they are in public spaces.

Community groups and businesses that have facilities might investigate whether they can create events or opportunities to share those facilities, such as having community dinners. We might also be able to make facilities such as showers and toilets available for use by members of the public who may not have access to a safe and secure place themselves.

WE CAN HAVE INFLUENCE IN OUR PERSONAL LIVES

There is a lot of stigma and shame associated with experiencing homelessness. We can treat people experiencing homelessness or housing stress with dignity and respect. If we see someone in the street experiencing homelessness, we can stop and engage.

MENTAL HEALTH

Mental health and wellbeing, just like physical health, exist on a spectrum. Mental illnesses, such as anxiety, depression, and substance abuse disorders are common, affecting millions of Australians of all ages and backgrounds. It is also important to recognise that less severe mental health concerns still undermine the mental wellbeing of too many Australians.

Any number of factors can contribute to a person's experience of mental ill health, particularly economic stresses such as unemployment and homelessness, and social factors including family and domestic violence, discrimination and exclusion, loneliness and social isolation. Minor mental health problems can develop into more significant illness and this can have monumental negative impacts upon every component of a person's work, social and family life. People experiencing significant mental illness can find it difficult to maintain employment, stable housing, connection to loved ones, and even physical health.

While significant progress has been made in recent years to raise awareness and improve access to mental health services, challenges persist in addressing the diverse needs of the population. Access to mental health services remains a critical issue, particularly in regional and remote areas where services are often limited or inaccessible. Long wait times, high costs, and a lack of culturally appropriate services can create barriers to seeking help for those in need. Additionally, stigma surrounding mental illness continues to deter individuals from seeking

support and can exacerbate feelings of shame and isolation.

Mental illness does not discriminate. It is important that anyone experiencing mental ill health can access timely, non-judgmental and effective support so everyone can achieve and maintain mental health and wellbeing.

People living with mental ill health are likelier to develop a physical illness and are more likely to be hospitalised for preventable reasons.²²

People living with mental illnesses have a life expectancy 10 to 15 years shorter than the general population, and this trend is growing.²³

44%
EXPERIENCED
MENTAL
ILL HEALTH

44 per cent of the population, approximately 8.6 million Australians, have experienced mental ill health at some point in their life.²⁴

4.2M
IN THE PAST
12 MONTHS

21 per cent of Australians (4.2 million people) have experienced mental ill health in the past 12 months.²⁵

WE HAVE THE POWER TO MAKE A DIFFERENCE

WE CAN URGE ACTION FROM OUR GOVERNMENTS

Economic and social factors can negatively impact a person's mental health. Systemic issues such as poverty, housing insecurity, family and domestic violence and other social and economic factors need to be addressed for any mental health strategy to be effective.

Governments can work together to implement diverse, ambitious, evidence-based trial programs to explore new approaches and deliver active outreach. One key priority is fixing the issue of the "missing middle" of mental health care provision, to address mental ill health before a person reaches a crisis.

WE CAN IMPLEMENT CHANGE IN OUR COMMUNITY AND OUR WORKPLACES

It is critical that workplaces treat employees' and volunteers' mental health and wellbeing as an element of Workplace Health and Safety (WHS). One action workplaces can take is to offer relevant staff and volunteers, including managers, leaders and senior staff members, training in mental health first aid just as we do physical first aid.

Our community groups can be powerful in providing social connection that can build resilience against mental ill health. It is important that we make sure that our events, activities, and spaces are welcoming for all people and do not create stigma around mental ill health.

WE CAN HAVE INFLUENCE IN OUR PERSONAL LIVES

In our own lives we can find strategies to build positive mental health and wellbeing. This includes asking for help when it is needed and finding out about local supports and services to foster positive mental health and address mental health concerns.

We can talk to the people in our lives if we are worried about their mental health, ask if they are okay, listen and help them to access support. If you are not sure what to say, there are helpful resources online.

FINANCIAL HARDSHIP AND INCLUSION

Although poverty is often hidden in Australia, it can be a crushing reality for those experiencing it. Financial hardship often involves making impossible choices between essentials — food or rent — and being in a near constant state of worry and stress about having your basic needs met. Stress around financial pressures can have negative impacts on people’s health and wellbeing. Fear, shame, and the feeling of being trapped cause significant harm, and individuals may withdraw from community and friendships, becoming isolated.

Experience of poverty can easily change a person’s life trajectory, impacting employment, housing, education and health outcomes for much of their life.²⁶

Many Australians are only a few financial shocks away from severe financial hardship, that could look like losing a job, sudden or chronic illness or a relationship ending. It’s important that we build our system so that a financial shock does not mean long-term experiences of poverty. Unfortunately, our current social welfare system is not fit for purpose. People who are relying on income support payments are unable to afford necessities,

often having to go without meals, falling behind in payments, or having to access debt to stay afloat. This is the case no matter how savvily or carefully they budget. Such a low income makes it hard to find secure and stable employment and can lead to long-term unemployment, social isolation, entrenched poverty, and intergenerational disadvantage.

Cost of living pressures are affecting almost all Australians but they are not affecting us equally. It is critical that we make sure those who are doing it toughest can still have their needs met.

3.3M

LIVING BELOW THE POVERTY LINE

In 2022, there were 3.3 million people (13.4 per cent) living below the poverty line, including 761,000 children (16.6 per cent).²⁷

\$8

PER WEEK LEFT AFTER ESSENTIALS

The 2024 Red Shield Appeal report found that people accessing emergency relief had \$8 a week left after essential spending such as housing and groceries. Respondents who were reliant on government payments went backwards and had -\$2 after essentials.²⁸

Poverty is more pronounced for women than men, with larger gender differences in rates of poverty for young women and women aged 55 and over.²⁹

People who experience childhood poverty are up to 3.3 times more likely to remain in poverty in adult life.³⁰

WE HAVE THE POWER TO MAKE A DIFFERENCE

WE CAN URGE ACTION FROM OUR GOVERNMENTS

Our social safety net is failing people. The Commonwealth Government needs to review and radically increase the rates of income support, such as JobSeeker and Youth Allowance, so that unemployment does not mean long-term poverty.

Governments need to work together to prioritise ending homelessness and housing stress. A commitment and concrete plan to increase social housing to at least 10 per cent of housing stock in Australia is a key intervention that will ease housing stress across our community.

WE CAN IMPLEMENT CHANGE IN OUR COMMUNITY AND OUR WORKPLACES

Workplaces and community groups often support causes through fundraising and learning opportunities. Poverty is a foundational social justice issue that leads to, results from, or exacerbates every other disadvantage in this report. When we are choosing a cause to highlight, we can choose ones that address the underlying issue of financial hardship.

When organising events, activities and memberships we can keep in mind that cost may be a barrier to some people participating. We can actively keep the individual cost of participation as low as possible and consider providing bursaries or scholarships to assist with costs that can be accessed without shame or stigma.

WE CAN HAVE INFLUENCE IN OUR PERSONAL LIVES

We can give to or volunteer with groups that are working to support people experiencing poverty. While structural issues need to be addressed, in the meantime there are already so many people doing what they can and so many opportunities to get involved. Acting in our own communities, we can make a difference for people one at a time.

SOCIAL ISOLATION AND LONELINESS

People often associate social isolation and loneliness with the COVID-19 pandemic but this has been an issue in our community for a long time. Social isolation and loneliness are different but related. Social isolation is a measure of meaningful social connection and interaction while loneliness is the unpleasant feeling that may come about because of social isolation.

There are many causes of social isolation and loneliness. Social isolation can result from several factors, including geographical remoteness, life transitions, and societal changes.

Many older people experience loneliness and social disconnectedness due to factors such as retirement, loss of loved ones, and physical health

limitations. Young people in Australia also face challenges related to social isolation. Despite being more connected than ever through online platforms, many young people report feelings of loneliness and disconnection, which can impact their self-esteem, mental health, and sense of belonging.

There is a clear relationship between financial hardship and social isolation and loneliness. People experiencing poverty or financial hardship are often forced into social isolation and develop feelings of loneliness.

People experiencing loneliness have a higher risk of mental ill health, particularly depression and anxiety. This can start a feedback loop, as people who are anxious or feeling depressed

may isolate themselves further as a coping mechanism. Loneliness can have other implications too, including poorer physical health, pain and sleep disorders, and even gastrointestinal disease.

Once a person experiences the negative implications of social isolation and loneliness, it can lead to other forms of disadvantage, including difficulty maintaining employment, housing, and other relationships. This is why it is so important to foster meaningful and purposeful social connections, and a sense of belonging and community inclusion (while providing accessible resources and support services), so all individuals feel valued, connected, and supported in their communities.

In August 2022, about one in 20 (4.8 per cent) Australians reported never meeting socially with friends, colleagues or relatives. This is more than double pre-pandemic levels of isolation.³¹

Young people (aged 18-24) were most likely to report high levels of loneliness throughout the pandemic.³²

TWICE
AS LIKELY TO HAVE
CHRONIC DISEASE

People who are moderately lonely are twice as likely to have chronic disease as people who are not lonely.³³

46%

TOO EMBARRASSED TO
ADMIT FEELING LONELY

46 per cent of people say they are too embarrassed to admit it to others when they feel lonely.³⁴

WE HAVE THE POWER TO MAKE A DIFFERENCE

WE CAN URGE ACTION FROM OUR GOVERNMENTS

Governments can lead the conversation on social isolation and loneliness by creating frameworks of accountability such as developing ways of measuring social isolation and loneliness and appointing a minister with responsibility for minimising social isolation.

Governments of all levels can work to address service gaps that can cause people experiencing hardship (such as family and domestic violence, homelessness, substance misuse, and mental ill health) to be pushed into isolation and loneliness.

WE CAN IMPLEMENT CHANGE IN OUR COMMUNITY AND OUR WORKPLACES

Community groups have huge power to address loneliness and social isolation. This might involve dedicated outreach to attract more participants to events or activities, or checking in and building deeper connections with currently active members.

Workplaces are an important element of many people's social lives. We can provide constructive social interaction for employees but we can also see our businesses as opportunities for social connection with customers and community members.

To foster connection, social programs need to be welcoming to a broad cohort, and flexible and adaptable to a specific community's needs. Community groups can be collaborative and interconnected to support those with more intensive needs.

WE CAN HAVE INFLUENCE IN OUR PERSONAL LIVES

We can address social isolation and loneliness in ourselves and in our community by being open to building social connections across all aspects of our lives, from our neighbourhoods, workplaces, community groups, and family.

We can learn how to identify and support someone experiencing social isolation and loneliness. This can have a profound impact on the people around us.

CLIMATE CHANGE

Australia's climate has warmed since records started to be kept in 1910.³⁵ This is because of the greenhouse effect, where the level of carbon dioxide and other greenhouse gases in the Earth's atmosphere act as a blanket, trapping in heat.³⁶ The United Nations Intergovernmental Panel on Climate Change (IPCC) found that this has been caused by human activities.³⁷

Changes in our climate have led to:

- More frequent and intense extreme weather events like floods, heatwaves and bushfires
- Changes to rainfall patterns
- Rising sea temperature and levels
- More hot days and less cold days
- Coral bleaching³⁸

Climate change impacts go beyond the environmental impacts. Climate change will have strong impacts on physical and mental health, including those resulting from lack of access to clean water and sanitation, changes to spread in diseases, increased natural disasters, and poverty.

We are already experiencing this in Australia with disaster trends

being complex, compounding and cascading, and it is expected to get worse.³⁹ Climate change responses must lower emissions and help our community adapt to a changing climate. Unfortunately, people already experiencing disadvantage are more likely to be impacted negatively both by climate change and by measures to adapt. They typically have fewer resources to reduce the personal impact of climate change (such as installing solar panels or moving to a safer region) and to recover from it (such as rebuilding after a flood or fire). This means that addressing climate change is not just an environmental or economic imperative — it is a social justice priority.

1.47°C
WARMER

Australia's climate has warmed by an average of 1.47°C since national records began in 1910.⁴⁰ Global surface temperature was 1.09°C higher in the decade between 2011–2020 than in the period between 1850–1900.⁴¹

There has been an increase in extreme fire weather, and a longer fire season, across large parts of Australia since the 1950s.⁴²

84%
DIRECTLY
AFFECTED

A Climate Council survey found that 84 per cent of respondents had been directly affected by at least one climate-fuelled disaster since 2019. The same percentage report being worried that their home insurance may become unaffordable due to worsening disasters.⁴³

\$1532
AVERAGE COST
PER AUSSIE HOUSEHOLD

It is estimated that the extreme weather events that happened between September 2021 and September 2022 cost every Australian household an average of \$1532.⁴⁴

WE HAVE THE POWER TO MAKE A DIFFERENCE

WE CAN URGE ACTION FROM OUR GOVERNMENTS

As a nation we can commit to deep, rapid and sustained reductions in Australia's greenhouse gas emissions before 2030, and net zero carbon dioxide emissions by the early 2050s.

At all levels of government, we can invest in, and create, policies that encourage widespread investment in renewable energy, energy conservation and efficiency, and reducing transport emissions.

In relevant policy, regulatory and planning settings, the risks and impacts of climate change, especially on those already experiencing disadvantage, can be at the forefront of decision-making processes. Given the increasing likelihood and severity of climate-related disasters, it is imperative that governments commit effort and resources to developing resilience and preparedness.

WE CAN IMPLEMENT CHANGE IN OUR COMMUNITY AND OUR WORKPLACES

When we are making a business decision about what we sell or purchase and how we manage waste, we can consider the climate change impact of our actions.

Our community groups can support local food growers and producers, reclaim green spaces, or grow the local circular economy.

When we've found actions that work, we can share knowledge and resources to help and encourage others in the community reduce our individual and collective footprint.

WE CAN HAVE INFLUENCE IN OUR PERSONAL LIVES

We can commit to one change to reduce our individual greenhouse gas footprint. This could look like eating more sustainable and healthy meals once a week, reducing our food waste, catching public transport, cycling or walking instead of driving, or changing the energy sources we rely on.

ABOUT THE SOCIAL JUSTICE STOCKTAKE

The Salvation Army believes that the social justice issues we face in Australia can be addressed. This is something we all can play a part in, through the influence we have in our personal spheres, in our workplaces, and communities, and by advocating for change with governments and other decision-makers.

SURVEY DESIGN

The Social Justice Stocktake survey was designed to capture the perspectives of a diversity of everyday people living in Australia. The survey focused on social justice issues present in local communities, and people across every state and territory were invited to take part. The survey included both multiple-choice and open-ended questions. We asked people to identify the top five social justice issues they were seeing in their local community and experiencing in their own lives. We then invited them to tell us what could be done about these issues and what they wanted decision-makers to know.

SURVEY DISTRIBUTION AND SAMPLING

The survey was distributed using an online platform to ensure easy access for a broad cohort. We heard from 15,918 people across Australia — including 100 or more responses in almost every federal electorate. We collected basic demographic information (age, gender, suburb, and postcode, and whether respondents identified with certain demographic groups). All respondents were over the age of 18. The survey was open for responses from February to April 2024. Participation was voluntary, and all responses were kept confidential.

REPORTING

We used the results from the survey to guide our focus on a range of relevant data. We also conducted a thematic analysis of the main themes from the open-ended responses. From this we produced 158 reports — one for Australia, one for each state and territory, and then one for each federal electorate, with the exception of the newly-created electorate of Bullwinkel (WA), where no data was available at the time of reporting. This year we collected enough responses in the Northern Territory to create electorate reports for both Solomon and Lingiari. In order to reflect respondents' views accurately, quotes included in this report were only edited for length and not for spelling or punctuation.

More information about the Stocktake, including access to all 158 reports and references, can be found at www.salvationarmy.org.au/socialjusticestocktake or by e-mailing policy.advocacy@salvationarmy.org.au

ACKNOWLEDGEMENTS AND THANKS

The Salvation Army's Policy and Advocacy team would like to thank the team at PureProfile, who administered the survey, and our colleagues in the Research and Outcomes Measurement team who provided the quantitative data analysis, as well as invaluable advice on qualitative data analysis. The Social Justice Stocktake would not have been possible without the 15,918 people who took the time to generously share their experiences and thoughts with us. For this we are grateful.

ABOUT THE SALVATION ARMY

The Salvation Army is an international Christian movement with a presence in over 130 countries. Operating in Australia since 1880, The Salvation Army is one of the largest providers of social services and programs for people experiencing hardship, injustice, and social exclusion.

As part of fulfilling our vision and mission, The Salvation Army in Australia has a small Policy and Advocacy team who work alongside our services, corps (churches), and the community to identify social justice issues, explore social policy solutions, and advocate for change.

OUR VISION

Wherever there is hardship or injustice, Salvos will live, love and fight, alongside others, to transform Australia one life at a time with the love of Jesus.
